Project Report

Jagrajan BHULLAR

Nguyen DUC PHUONG

August 7, 2017

1 The Problem

Talk about the Problem

2 The Data

Talk about the data we were given

3 Trying Out Classifiers

Talk about the different classifiers Jason tried and the results

4 Limiting the Options

Talk about limiting the number of categories for weather and how that helped + why we thought limiting the categories was a good idea

5 A Different Approach

Talk about Jag trying out testing for individual categories — this section may get long

6 Changing the Question

How does the different approach change the question?

7 Meaningfulness of Results

Does the new approach answer the original question, or do these results lose meaning?
